CT-Rated Power Distribution

National Grid and Eversource Service Territory Approvals

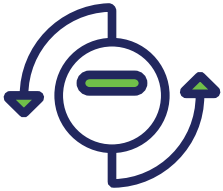

Reduced Lead Times

PWRvance offers pre-designed packages for EV charging, allowing accelerated lead times on well-established designs.

Integrated Transformer

PWRvance units feature seamless power adaption with an integrated transformer, ensuring optimal performance and overall compatibility.

Integrated CT Cabinet and Metering

PWRvance leverages nearly a century of Milbank expertise, enabling seamless integration of metering with utility-related specifications.

Utility Approved

PWRvance has several designs currently approved to 2000 amps with both Eversource and National Grid.

Cold Sequenced

PWRvance cold sequencing complies with Eversource's Cold Sequence requirements for CT-rated service applications.
